

In the Claims:

Please amend the claims as follows:

5

1. (ORIGINAL)

An RF Karaoke data receiving pack comprising:

an RF receiver for receiving a voice signal and key data signal radio-transmitted from a wireless microphone device via a receiving antenna;

a demodulator for demodulating the signal applied thereto from the RF receiver;

an audio/key data separator for separating the voice signal and key data signal from the signal demodulated by the demodulator;

a waveform shaping unit for shaving the waveform of the key data signal;

an A/D converter for converting the voice signal into a digital signal;

a receiver MCU connected to an external computing device having a computing function and a sound processing function, the receiver MCU controlling the internal operation of the RF Karaoke data signal receiving pack while transmitting the digital voice signal and key data signal to the external computing device;

a serial communication interface transmitting the digital voice signal and key data signal to the external computing device under the control of the receiver MCU; and

an extension pack in which additional songs are recorded, the extension pack being connected to an

extension pack slot to transmit data of the additional  
5 songs under the control of the receiver MCU.

2. <sup>(ORIGINAL)</sup> The RF Karaoke data receiving pack as  
claimed in claim 1, wherein the serial communication  
interface transmits or receives signals in a wired or  
10 wireless manner using one of a USB drive, an RF  
transceiver, a laser transceiver and an infrared  
transceiver.

3. <sup>(ORIGINAL)</sup> The RF Karaoke data receiving pack as  
15 claimed in claim 1, wherein the external computing  
device comprises an X-box game device.

4. <sup>(ORIGINAL)</sup> The RF Karaoke data receiving pack as  
claimed in claim 1, wherein the external computing  
device comprises the main body of a personal computer.

20 5. <sup>(CURRENTLY AMENDED)</sup> The RF Karaoke data receiving pack as  
claimed in any one of ~~claims~~ <sup>CLAIM</sup> 1 ~~to 4~~, wherein the  
extension pack comprises:

a housing forming the body of the extension pack;  
25 an antenna wire fixed inside the housing along the  
edge of the housing, the antenna wire capturing an RF  
signal and transmitting the captured RF signal;

an RF signal receiving pack for demodulating the  
RF signal transmitted from the wireless microphone  
30 device and captured by the antenna wire and separating  
a song data signal from the RF signal;

a male connector for a receiving module, the male

connector being electrically connected to an output  
5 signal line of the RF signal receiving pack and  
protruded from one side of the housing 282 such that  
the male connector is connected to the extension slot  
under the control of the receiver MCU; and

a plurality of storage packs fitted in the housing,  
10 for storing data of new songs and outputting the data.

6. <sup>(ORIGINAL)</sup>  
A Karaoke system comprising:

a wireless microphone device for modulating key  
data signal generated from various keys including  
15 numeral keys used for selecting a song and  
accompaniment keys and a user's voice signal and radio-  
transmitting the modulated key data signal and voice  
signal;

an external computing device including a  
20 computing function, a serial communication interface  
and a sound processing function, the external computing  
device being the subject of the operation of the  
Karaoke system;

an RF Karaoke system data receiving pack for  
25 receiving the voice signal and key data signal from the  
wireless microphone device, demodulating the received  
voice signal and key data signal and transmitting the  
demodulated voice signal and key data signal to the  
external computing device via the serial communication  
30 interface;

an optical disk for storing a Karaoke system  
operating program executed and read by the external

computing device, song data and background image data;  
5 and

an audio device connected to the external  
computing device through a connector for reproducing an  
audio signal provided by the external computing device.

10 7. *(ORIGINAL)* The Karaoke system as claimed in claim 6,  
wherein the serial communication interface comprises a  
USB interface.

8. *(CURRENTLY AMENDED)* The Karaoke system as claimed in claim 6 ~~or~~  
15 ~~7~~, wherein the optical disk comprises a DVD-ROM.
